**Cancer Screening Now Available at The Blood and Cancer Clinic**

The Blood and Cancer Clinic of Fayetteville now offers cancer screenings. Performed by the Clinic's Board Certified Oncologists, the comprehensive screenings include medical history/examination and any appropriate lab and radiology testing, as well as additional testing, if needed.

“Early detection of cancer and timely treatment can increase one’s chance of survival,” says Dr. Tariq Nazir. “That’s why we encourage people who are experiencing certain warning signs to be screened for cancer.” Cancer warning signs include an unexplained lump, mass or growth on any part of the body, unintentional weight loss, weakness, unexplained bruising or new onset of back, rib or other bone pain.

Dr. Nazir is Board Certified in Oncology and Internal Medicine. His partner at The Blood and Cancer Clinic, Dr. Shirish Devasthali is Board Certified in Oncology.

Anyone who would like to make an appointment for a screening can call The Blood and Cancer Clinic at 910-483-8586. Physicians may also refer their patients. The Clinic is located in Suite 301 of the Purdue Medical Center at 1565 Purdue Drive.

In addition to cancer screenings, The Blood and Cancer Clinic offers cancer treatment, including chemotherapy, as well as cancer pain management and treatment for benign blood disorders – in the soothing, more intimate environment at their state-of-the-art facility.
